Mikhail Efimov

Front-End developer React JS

Baku, Azerbaijan

Citizenship RUS, 29 years

About myself:

I am a beginner Front-End developer. Throughout my career, I somehow interacted with the websites of companies, and gradually interest in this area increased. And when the opportunity arose, including the financial one, I left my main job and chose the option of self-study. For 4 months, I studied layout, JavaScript, the React library, the GIT version control system and at the same time made my first resume project with a blog.

Throughout this time, I was assisted and guided by an experienced mentor. All materials were taken from open sources, including YouTube. All activity during this time can be tracked on my GitHub: <https://github.com/Miefim>
